Buckingham-Pi theorema

Een relatie:

$$a = f\left(a_1, a_2, \dots, a_n\right)$$

 $\operatorname{met} k$ grootheden met onafhankelijke dimensies

Buckingham-Pi theorema

Een relatie:

$$a = f\left(a_1, a_2, \dots, a_n\right)$$

met k grootheden met onafhankelijke dimensies

kan herschreven worden als:

$$\pi = f\left(\pi_1, \pi_2, \dots, \pi_{n-k}\right)$$

met $\pi, \pi_1, \dots, \pi_{n-k}$ dimensieloze grootheden
